

There is a new feature available, within the session results found on our website, which could help you improve your card play.

The web link is "replay with bridge solver" and is displayed under board results for each hand played in a session.

By selecting this link you can replay the boards, and find out how to make the contract that you failed to make!!

There are helpful suggestions on cards to play, both in defence and attack and looking at the options suggested, should help you to improve your overall card play.

Enjoy!!
